

MiFID 2 – Information on Costs and Charges

In the context of the entry into force on 3 January 2018 of the new regulation for financial markets, and pursuant to Article 24.4 of Directive 2014/65/EU (known as "MiFID 2") and Article 50 of the Delegated Regulation 2017/565, you will find below information on estimated ex-ante costs and charges under normal market conditions for the Crédit Industriel et Commercial ("the Bank") products listed in the table below.

The costs and charges presented in this table mainly take into account market risk hedging costs, transaction processing costs, and related operating charges. The final price you will be offered will already include these costs as well as the margin for the Bank.

No service charges, as defined by the aforementioned regulation, are levied on these products and no third-party payments are received by the Bank. Moreover, given the nature of the products, the Bank is unable to provide an illustration of the cumulative effect of the costs on performance.

The nominal value mentioned in the table below is the maximum nominal value of the transaction processed, in the case of a fluctuating nominal value.

The following table has been prepared by the Bank, based on a reasonably measured estimate of the costs and charges of the financial instrument, under normal financial market operating conditions. In the event that the latter do not allow the Bank to remain within this framework, or if the transaction presents risks for the Bank such that the following costs and charges may not apply, then your usual contact on the trading floor would provide you separately with an estimated amount of expected costs and charges.
